## Delegation Applauds Secretary of the Navy's Decision to Name Future

### Destroyer After Senator Ted Stevens

WASHINGTON, DC – The Alaska Congressional Delegation today proudly announced that Secretary of the Navy Richard V. Spencer has named a future Arleigh Burke-class guided missile destroyer in honor of the late U.S. Senator Ted Stevens, who served as Alaska's Senator from 1968-2009.

"It is an honor to help Secretary Spencer announce the naming of the USS Ted Stevens today," **said Senator Sullivan**. "As an Army Air Corps officer, a civil servant, and a historic U.S. Senator from our great state, Senator Stevens remains one of the shining examples of public service to our nation. We Alaskans affectionately called him 'Uncle Ted.' However, before he was our U.S. Senator, Senator Stevens bravely flew missions behind enemy lines in the Pacific Theater during WWII, supporting the now famous 'Flying Tigers.' I can think of no more fitting tribute than to name DDG-128, a powerful Arleigh Burke-class destroyer, after Ted Stevens. May this ship bearing his name continue his remarkable legacy for decades to come and may her crew gain inspiration for their missions from one of our country's truly great men."

"During WWII, Senator Stevens earned the Distinguished Flying Cross, the Yuan Hai Medal, and the Air Medal for his selfless and brave service as an Army Air Corps pilot. In addition to his notable military career, Senator Stevens was a public servant, a mentor, and a dear friend whose dedication and commitment to Alaska was nothing short of extraordinary," **said Senator Murkowski**. "I commend Secretary Spencer and the U.S. Navy for naming a future Arleigh Burke-class Destroyer, the USS Ted Stevens, in his honor—a remarkable acknowledgement of the service, sacrifice, and life of our Uncle Ted."

"The Arleigh Burke-class of destroyers is one of the toughest and most capable warfighting tools our Nation produces, characteristics which also define my dear friend, the great Senator Ted Stevens," **said Congressman Young**. "It is my honor to join my Senate colleagues and Secretary Spencer in announcing the naming of an Arleigh Burke-class destroyer as the USS Ted Stevens. From his service as a pilot in the Pacific Theater during WWII flying over the Hump, to his fierce advocacy for Alaska and our Nation, Ted always exemplified American patriotism. He dedicated much of his adult life in service to our Nation, and I hope that this ship continues to embody his legacy and its name gives her crew the inspiration needed to fulfill her missions."

#### **Background (information provided by U.S. Navy):**

Arleigh Burke-class destroyers conduct a variety of operations from peacetime presence and crisis response to sea control and power projection. The future USS Ted Stevens (DDG 128) will be capable of fighting air, surface and subsurface battles simultaneously, and will contain a combination of offensive and defensive weapon systems designed to support maritime warfare, including integrated air and missile defense and vertical launch capabilities.

The ship will be constructed at Huntington Ingalls Industries' Ingalls shipbuilding division in Pascagoula, Miss.. The ship will be 509 feet long, have a beam length of 59 feet and be capable of operating at speeds in excess of 30 knots.
